

Assignment 2 – Team Contribution

Team Contribution Table - Team Agreement and Peer Evaluation

This contribution table enables every team member to be recognised for their active and full participation in the team assignment process. It is the expectation that every student makes the most of the ability to continuously develop valuable teaming skills.

Your personal final mark for Assignment 2 will reflect your level of contribution to the group. A group mark will be determined and, as required, adjustments will be made for individual team members. The eLA will have final say in the mark awarded to individual students.

Step 1

During the first group meeting (26 April 2026) all team members defined and agreed on what each level of contribution means to the group. The table below documents these agreed definitions, signed off by all members.

Member Category	Attributes of each category
100%	Attends all six team meetings. Actively contributes to agendas and discussions. Completes all agreed action items on time and meets all deadlines. Communicates proactively, responds within 24 hours. Produces high-quality work. Contributes equally to coding, testing, and report writing. Supports teammates when needed.
75%	Attends most meetings (misses at most 1 without prior notice). Completes most agreed tasks but may need reminders. Generally meets deadlines with minor delays. Contributes to core deliverables but may not assist teammates proactively.
50%	Attends approximately half of meetings. Completes some tasks but misses others. May need significant follow-up. Contributes to some deliverables inconsistently. Communication is irregular.
25%	Rarely attends meetings. Completes very few agreed tasks. Little meaningful contribution to deliverables. Requires repeated follow-up. Quality of work is below expectations.
0%	Does not attend meetings. Does not complete any agreed tasks. Makes no contribution to the assignment. Does not respond to team communications.

Step 2

Final contribution levels agreed upon by all team members upon completion of Assignment 2B (agreed at Meeting 6, 29 May 2026).

Note: Please fill in Student ID numbers before submission.

Team Member Name	Student ID	Level of Contribution (0–100%) and comments
Saniru	105332151	100% - Attended all 6 team meetings. Implemented the complete codebase: data_processor.py, train_models.py (LSTM, GRU, CNN-LSTM), travel_time.py, route_finder.py, and gui.py. Recorded and analysed all model evaluation results (MAE, RMSE, MAPE). Wrote README and config.json setup files. Managed GitHub repository, led overall report writing and structure, designed all 12 test cases, and coordinated final Canvas submission. Completed all action items on time.
Haresh	[Student ID]	100% - Attended all 6 team meetings. Implemented LSTM and GRU models in train_models.py. Ran full model training pipeline, recorded MAE/RMSE/MAPE results, and produced evaluation plots. Drafted Testing section of report. Committed ML code to GitHub. Completed all action items on time. tie breaking. confirmed OLA access. Ran and documented all 12 test case results on Windows 11. Completed all action items on time.
Manula	[Student ID]	100% - Attended all 6 team meetings. Designed and implemented CNN-LSTM model. Conducted comprehensive model evaluation and comparison. Drafted Insights and Research sections of report. Verified all APA 7 references and proofread final report. Completed all action items on time. tie breaking. Contributed to report sections covering GBFS and A* implementation. Set up shared GitHub repository. Proofread the final report and verified all APA 7 references. Completed all action items on time.

Signatures

Names and signatures below indicate that all members agree to the above contribution level attributes and scores.

<u>Name</u>	<u>ID</u>	<u>Signature</u>
